DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1-11 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for specific disclosed supply mechanism, physical cleaning mechanism and for specifically disclosed oxidation liquid, etching liquid and specifically disclosed physical cleaning, does not reasonably provide enablement for non specified mechanisms, liquids and physical cleaning. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to practice the invention commensurate in scope with these claims. The specification provides no guidance regarding which mechanisms, liquids and physical cleaning, except for the specifically disclosed ones can be used. Without such guidance an ordinary artisan would not be able to practice the claimed invention without undue experimentation.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 1746

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Sato et al (US 2002/0059947).

Sato et al teach an apparatus as claimed. See entire document, especially Figures 1, 3, 4, 5, 6, 7 and the related description and parts [0036] and [0072].

6. Claims 1-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Ohmi et al (US 5,487,398).

Ohmi et al teach a method and apparatus as claimed. See entire document, especially Figures 1, 2, 3, 6 and the related description.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US 2002/0035762, US 2002/0005214, US 2002/0170572 and US 2001/0042559 are cited to show the state of the prior art with respect to cleaning methods and apparatuses.
